Here, we have the sweet little female.... DOLLY. `A CDH friend, David, came across a litter of six little puppies who were just a day or so old. One had already passed away and the others were struggling. Unfortunately, another two passed away.... they just weren't strong enough and couldn't suckle. This was certainly the weakest litter that CDH has attempted to rescue. Finally, there were three who fought their way to good health..... they are going to be quite small and we think they are ChihauhauX.

Once they got going, they were full of the joys of life and quickly took control. Vet checks are clear and they've been chipped and fully vaccinated. They are ready for their "furever" home!

We're thrilled that Dolly was adopted with David, into the same family. They'll be in different homes with one being in the North, but it's great to know that they will get to see each other from time to time.
