Walking his dog in the forest a CDH friend, Peter, came across a bag of mini-podengo newborn puppies, just thrown away like garbage. Unfortunately, 2 had already died and later at the Haven, another puppy passed away whilst being bottle fed. Their eyes weren't yet open; we thought they were about 5 days old. The remaining puppies have done really well and one (Xena, female) was adopted quite quickly. A really noticeable feature with this litter is that they all have really lovely eyes.... light and full of expression. POPPY was the "runt of the litter" and at first, struggled to thrive. Sharron kept her in her home until she started to grow into the beautiful girl she is now... she's active, curious and really bright. Poppy is ready for her "forever" home!

Cacela Dog Haven

..... every dog deserves a loving home!

We are thrilled that **POPPY** has found her "forever" home..... it's lovely that she's going to be living locally, in Luz de Tavira. We love it when that happens because we often get to see them again. These photos were taken just after adoption..... we are sure you'll agree that the CDH dogs adopted are gorgeous specimens..... healthy, well nourished, fit and so loved!
