A CDH supporter found a bag with 9 Mini-Podengo puppies. Although they were around 5 days old, their eyes were still closed. At the time, 2 of them were already dead and a third one died at 3 weeks. They were obviously dehydrated, stressed and not well at all.... the 2-hourly bottle feeding programme kicked in and 13 weeks later, they are tiny bundles of energy. Xena was adopted by Donna and Marco and she'll be based in Tavira.... we like it when they are still close!
