Kacey (around 5-years old), was found heavily pregnant, dumped in the street because her owner apparently didn't want to sterilise her.

On Wednesday, 1 November Kacey started giving birth and eight beautiful puppies later, she settled down and proceeded to encircle them with her paws, constantly nudging and fretting if one moved away. She was obviously nervous about protecting her babies and only Sharron could approach..... we definitely didn't want her to feel even more anxious.

LEO is one of the puppies and we think their Dad was perhaps a Rafeiro do Alentejo..... they are of course, all beautiful! We suspect that he will be quite large.

LEO has gone to live with a UK expat family in Loulé... we're really thrilled because we're sure to get news about his progress regularly.
