Walking his dog in the forest a CDH friend, Peter, came across a bag of mini-podengo newborn puppies, just thrown away like garbage. Unfortunately, 2 had already died and later at the Haven, another puppy passed away whilst being bottle fed. Their eyes weren't yet open; we thought they were about 5 days old. The remaining puppies have done really well and one (Xena, female) was adopted quite quickly. A really noticeable feature with this litter is that they all have really lovely eyes.... light and full of expression! ROWAN is so cute.... she's fully vaccinated, chipped, active, curious, really sweet and very playful! She's ready for her "forever" home!
