Just 4-5 days old, with their eyes still closed, these four beautiful Alentejo/Spanish Mastiff pups (1 x male, 3 x female) were found in the trash, dumped as though they were mere garbage. Bottle feeding began immediately and, as you can see, they are thriving! Now weighing around 6kg (8 weeks old), we think they'll be around 40kg when fully grown. **They'll be ready to leave for their new homes around 19 May...** chipped and fully vaccinated. All named after Vikings, we are so keen to find families for them! This little girl is really pretty..... she has a sweet personality and is going to make a fabulous pet.

ADOPTED.... and living in Loulé.
