## DOGGY STORY : KENDRA

**Born:** 6/2023

**Rescued:** 6/2023

**Adopted:** 8/2023

**No:** 265

Found by our volunteer Denise, who is Mum to the lovely Elsa, a CDH rescue, these 6 puppies were found in a polystyrene box just dumped out in the open. It was Easter Friday and SEPNA (the animal authority branch of the GNR) were contacted at 9h30 to report that these puppies had been found.

Because Sharron was concerned about the puppies, she went to the location at around 16h00 and was shocked to find that the puppies were still there! Six and half hours had passed and these newborns had been left there by the organisation responsible for their rescue.

How is it possible to have any trust in a Government structure that fails so hopelessly when it comes to the absolute basics? Of course, the four females and two males were immediately rescued by CDH, severely dehydrated and naturally, lethargic and exhausted.

Fast forward a few weeks..... after intensive care and bottle feeding, we had a litter of bouncing beauties!

All of these puppies were rehomed by our associates in Holland.
